SUMMARY

Final-year Bachelor of Computer Science (Hons) in Network Engineering student at Universiti Malaysia Sabah with strong interest in software development and emerging technologies. Experienced in building web and mobile applications using modern frameworks and tools, with exposure to AI-related technologies. Currently undergoing an internship at Zenara Jaya, Miri (16/03/2026 – 28/08/2026). Seeking opportunities in software engineering, mobile and web development, or IT support after internship completion.

EDUCATIONAL BACKGROUND

Bachelor of Computer Science with Honours (Network Engineering) **2022 - 2026**

- University Malaysia Sabah

Ministry of Education Matriculation Certificate

2020 - 2022

- Kolej Matrikulasi Negeri Sembilan, Kuala Pilah

WORKING EXPERIENCE

Internship | Zenara Jaya

2026 - Ongoing

- University Malaysia Sabah
- Built a Client Relationship Management system
- Developed full stack mobile application for an elder care home client

Part-Time E-Hailing Driver

2024 - 2026

- Conducted part-time e-hailing services while pursuing studies at Universiti Malaysia Sabah
- Developed strong communication and interpersonal skills through daily interactions with passengers
- Demonstrated strong time management and multitasking skills by balancing work and university commitments.

Part-Time Courier

2024

- Handling parcel delivery and pickup operations in a timely and efficient manner.
- Developed a strong sense of responsibility by ensuring timely and accurate delivery of parcels.
- Gained experience in handling tasks independently with accountability and attention to detail.

Restaurant Waiter

2019

- Worked as a waiter in a restaurant, providing attentive and friendly customer service in a fast-paced environment.
- Ensured cleanliness and proper table setup to maintain good dining experience and hygiene standards.
- Developed strong communication, teamwork, and customer service skills through daily interactions with guests

PROJECTS

ElderlyCare – Full-Stack Flutter Mobile Application

Tech Stack: Flutter, Dart, Fastify, PostgreSQL, Agile

- Assigned to develop and implement the backend system for a client's ElderlyCare mobile application
- Built and maintained REST APIs using **Fastify** to support application features
- Delivered backend functionality based on client requirements following **Agile development** practices

- Engaged in effective communication with other software developers to ensure project goals were met

Client Relationship Management System

Tech Stack: Next.js, React, Laravel, Agile

- Developed a Client Relationship Management System to manage client appointments
- Built the frontend using **Next.js** and **React** for a responsive and user-friendly interface
- Developed backend services using **Laravel** to handle appointment management and data processing
- Implemented features for client booking, scheduling, and appointment tracking to improve operational efficiency
- Followed **Agile** development methodology for iterative development and continuous improvement

MakanSedap – Full-Stack Restaurant Website

Tech Stack: Next.js, React, Django, Agile

- Full-stack restaurant website to simulate online food ordering and restaurant operations
- Built the frontend using **Next.js** and **React**
- Developed backend services using **Django** to handle menu data, orders, and application logic

BorneoLingua – Mobile Application for Sabah and Sarawak Native Languages

Tech Stack: Flutter, Dart, Fastify

- Freelance mobile application project focused on preserving and learning native languages of Sabah and Sarawak
- Built the mobile frontend using **Flutter (Dart)** and **Fastify** for the backend framework
- Designed the system to promote cultural preservation through digital language learning tools

TryLah! E-Commerce Platform with Virtual Try-On Technology

Tech Stack: HTML, MySQL, JavaScript, 3D Blender

- Full-stack e-commerce platform integrated with virtual try-on technology as the final year project
- Built the frontend using **HTML** and **JavaScript** to create an interactive and user-friendly shopping experience
- Designed and managed the database using **MySQL** to handle product, user, and transaction data
- Created 3D product models using **Blender** to support virtual try-on functionality and enhance user engagement
- Integrated 3D visualization features to allow users to preview products before purchasing

IoT Smart Border Surveillance System

- An IoT-based surveillance system for real-time monitoring and security alert detection
- Integrated hardware sensors with software system for data collection and automated notifications
- Used **Python** to process sensor data and handle backend logic for monitoring system events
- Strengthened skills in IoT system integration, backend development, and real-time data processing

Mini Buggy Ar Race

- Group assignment project using **Unity** with augmented reality (AR) features
- Collaborated with team members to design gameplay mechanics, race environment, and user interaction flow
- Contributed to problem-solving, debugging, and improving gameplay performance within the team
- Strengthened teamwork, communication, and Unity development skills through collaborative project work

EXTRACURRICULAR AND LEADERSHIP

- Appointed as **Media Committee (AJK Media)** for *Persatuan Mahasiswa Fakulti Komputeran dan Informatik (PMFKI)*, Universiti Malaysia Sabah
- Participated in the Sabah Net Cyber Challenge 2024, a cybersecurity competition held at SICC, Kota Kinabalu, on November 6th, 2024.

- Served as a member of the Unit Media Teknikal for the Program Yayasan Sarawak Cakna Sabah, on July 23th, 2024.
- Participated in the BIMP-EAGA Cyber Security Summit 2023 at the Sabah International Convention Centre (SICC), from November 7th to 8th, 2023.
- Represented Sarawak at the National-Level Tang Soo Do Championship in Perak, securing a Bronze Medal.
- Served as a Secondary School Prefect, responsible for upholding student discipline, enforcing school regulations, and actively assisting in the organization of school events.

ACHIEVEMENT

- Achieved the Fortinet Certified Fundamentals in Cybersecurity (FCF) certification, validating foundational competency in core security principles, threat analysis, and defense architectures.
- Obtained the Huawei Cloud Computing certification, demonstrating proficiency in fundamental cloud technologies and essential services for deployment and management on the Huawei Cloud platform.
- Earned the Cisco Certified Network Associate (CCNA) certification, validating practical expertise in configuring, operating, and troubleshooting medium-sized routed and switched networks.

SKILLS

Computer skills: Microsoft Office, Google Drive, UI/UX Design (Figma, Canva).

Technical skills : Framework (React, Next.js, Django, Laravel, Flutter), Networking (Cisco Packet Tracer, Wireshark) and Design (Blender, Unity3D).

Soft skills : Problem-Solving, desire to learn, self-awareness, teamwork, time management and communication.

Language skills : Bahasa Melayu (Native Proficient) and English (Fluent).
